What’s on LGfL for Primary?

Premium content and LA projects for e-learning

This booklet illustrates examples of the online teaching and learning resources provided as part of the London Grid for Learning (LGfL) education broadband service available to London schools. The booklet is a useful introduction but if you really want to be informed and make the most of LGfL resources you will find a visit and presentation by an LGfL Curriculum Consultant of immense value. Visit www.consultants.lgfl.net to find out more about LGfL Curriculum Consultants.

London Local Authorities and schools working together as the London Grid for Learning have provided an array of e-learning resources which are openly available on-line to all LGfL connected schools at no charge. The resources or ‘content’ come from three main sources.

1) The LGfL has created, licensed or commissioned a range of premium software resources focussed on supporting learning and teaching in the Primary phase.

2) Supported by LGfL, London LAs produce online content resources that include the best and latest practice in using a range of software and hardware across the curriculum. These resources are then made available across the region through the LGfL community.

3) The London Grid for Learning is also a member of the National Educational Network, which brings together all the regions of the UK, each with its own unique content – available for all to share, and accessible via the LGfL Content Management System.

A carefully selected panel of practitioners drawn from across the region scrupulously evaluates a wide range of materials and only selects those resources which are assessed as being of the highest standard for use by LGfL connected schools throughout the London region.

Selection by LGfL is widely regarded as an accolade of considerable significance by education content publishers. Schools can therefore be assured that time given to familiarising with these resources is well invested.

Access Rights

In most cases, access is automatic within all schools connected directly to the London Grid for Learning.

Look for the letter in brackets after each title which describes the level of access:

- **O** means open access; and a username and password is not needed at all.

- **USO** indicates the item is ‘premium content’ - access is still open and automatic for online use within any LGfL connected school, but an LGfL ‘USO’ username and password is needed for access from home.

- **S** means this is a special licence and access is restricted to within school only.

Teachers and pupils at connected schools can access LGfL content anywhere on-line using their LGfL Unified Sign On (USO) username and password. No USO? Visit www.uso.lgfl.net
Where to find the content

- The URL for the London Grid for Learning is www.lgfl.net

- From the home page, select the **Content Grid** link from the box on the right

- From the Content Grid (see below), choose your Key Stage and subject

- From the Key Stage subject menu, select the content you want to access.

The Content Grid

![The Content Grid diagram]

The Content Grid is simple to use. For example to access materials for Key Stage 1 Science click on the green arrow on the KS1 row below Science.

To access Foundation Stage resources, or for resources on the National Education Network, click on the tabs at the top of the table.
Using the LGfL ‘Sign-on’ Software

The London Grid for Learning’s USO ‘sign-on’ software enables every LGfL user to use premium software even when out of school.

Let’s say you wished to access Us Online from your home:

- As soon as you click on the Us Online item in the KS2 Citizenship menu, you will get this dialogue box

- Type in your LGfL USO username and password and select the login button

- If you get this dialogue box, or one like it, select the Yes button

- You are now able to access premium content on LGfL

NB: This does not apply to British Pathe or Audio Networks where the LGfL licence currently allows school-based access only.
Foundation and Early Years

• PB Bear (USO)

LGfL PB Bear provides 5 online video stories and talking books, with different activities based on Foundation goals. The activities are also mapped to the KS1 curriculum.

Produced in collaboration with a team of teachers and advisers from London schools, it is the result of the LGfL partnership with Pearson.

You can find PB Bear in the Foundation Stage as well as the KS1 Literacy, Numeracy and ICT menus.

You can find a summary of the activities by selecting the Activity menu button from the Stories home page.

www.pbbear.lgfl.net

• Magic School from I-Board (USO)

Choose a character, dress them up and change their appearance then visit one of the play rooms for a variety of EY-focused activities.

In this example, children can explore the sounds of instruments in the music room, compose a performance and play it on the music system on the wall.

www.iboard.lgfl.net
• **2Simple Talking Stories 1 for KS1 (USO)**

Five online talking stories on KS1 QCA topics (mainly History and Geography). The text is spoken out in a range of languages and all the stories include activities for a range of subjects.

The stories use Shockwave v10; if they don’t load on your computer it will be because you have an older version of the software. You can update your software to V10 online.

www.stories.lgfl.net

• **Talking Stories 2: Multimodal teaching resources for KS2**

This resource is in the KS2 Literacy menu. It supports the renewed framework for KS2 Literacy.

The ‘stories’ are Coleridge’s *The Ancient Mariner*, Sherlock Holmes in the *Red-Headed League*, the forest scene from *Midsummer Night’s Dream*, *Food*, and a co-production with the Metropolitan Police around the role of PCSOs.

Each story is a rich resource, supporting extensive work for KS2 Literacy, possibly up to 4 weeks in some cases, with additional off-computer resources for activities.

www.stories2.lgfl.net

• **Talking Stories 3 (for KS1 and 2) (USO)**

This is the third collection of Talking Stories from 2Simple software, working in collaboration with LGfL.

This popular resource has been expanded with familiar stories and traditional tales from around the world. Featured stories include: Orpheus, *A Trip in the Car*, *The Wishing Tree*, *The Emperor and his Advisor* and *The Parrots and the Raja*.

A unique feature of the collection is the ability to write and save your own stories online.

www.stories3.lgfl.net
150 new activities were added at the end of 2010 – with more cross curricular activities due for arrival early in 2011.

You can search by year and topic to find an activity to support KS1.

It is now possible to embed i-board resources into web pages and the London MLE, and also to package the content alongside your online forums, votes, web links and graphics.

This service enhancement will further strengthen school-to-home links by providing additional extended learning opportunities for pupils.

www.iboard.lgfl.net

**i-learn Speaking and Listening for KS1 and 2 (USO)**

Produced by Cambridge University Press

i-learn: Speaking and Listening has been designed to support the first four strands of the Primary Framework for literacy KS1 and 2 resources.

It is highly flexible and open-ended to allow for easy integration into all areas of the curriculum.

It can be used as a booster if children need support and reinforcement of particular skills, as part of a whole-school speaking and listening solution, or integrated into existing planning units - either in literacy or in other curriculum areas.

www.ilearn.lgfl.net
Perform a Poem in collaboration with Michael Rosen (USO)

The ‘Perform-a-Poem’ site allows teachers to upload performance poetry within a safe and secure context via the LGfL USO log in.

Teachers can upload videos of their pupils’ performances of their own, or out of copyright, poems.

The site provides a range of resources for teachers on choosing and writing poems, performing, filming, editing and uploading videos.

www.performapoem.lgfl.net

The Big Day Out (O)

The Big Day Out comes in two versions - one focussing on London based activities and the national version which provides a range of activities from around the British Isles. Activities incorporate Numeracy, Literacy, Geography, Science and History.

Each activity is designed primarily for Key Stage 1 pupils, and presents a scientific, mathematical or geographical challenge for investigation or exploration.

www.bdo.lgfl.net

J2E – Just 2 Easy (USO)

‘Just 2 Easy’ (J2E) is so much more than an online word processor. It is a complete suite of advanced online tools for use across the curriculum.

All files created can be saved via the LGfL USO log in.

Tools include:

- Word processing
- Desktop publishing
- Web drawing
- Data form / collection
- Webpage publishing
- Website creation

www.j2e.lgfl.net
The London Plan project has been created to support literacy and multi-modal approaches to looking at planning issues in London.

The project is supported by the iLearn Speaking and Listening LGfL resource (USO) and is referenced throughout in the lesson support material.

Participating schools can upload their thoughts on the planning issues in their area onto a regional map of London, building an ever increasing database of planning issues across the region.

www.londonplan.lgfl.net

Numeracy

- **I-Board Numeracy (USO)**

Find this in the KS1 Maths menu or directly at www.iboard.lgfl.net

I-Board Numeracy is organised into the seven strands across each year group and includes over one hundred interactive maths activities to strengthen pedagogy and employ whiteboards as an effective resource.

- **Multemaths for the renewed framework at KS2 (USO)**

Developed in conjunction with Anita Straker and BEAM, Mult-e-Maths offers flexible primary mathematics software designed for whole class teaching using an interactive whiteboard.

It promotes a range of pedagogic approaches - the 600 activities in Mult-e-Maths draw on different teaching strategies, techniques and tools to ensure progress for all.

www.multemaths.lgfl.net
MathsRaps for KS2 (USO)
Numbers and Calculations, Shape, Space and Solving Problems – 22 online rap videos covering basic rules for KS2 Numeracy.

Find them in the KS2 Maths menu or directly at www.mathsraps.lgfl.net

Get down with the Percentage Posse – it’s cool to know the rule!

Science

Virtual Experiments for KS1 (USO)
Collins’ Virtual Experiments for Infant Years is available on LGfL. You can find it in the KS1 Science menu.

It covers all the units of QCA Primary Science with structured introductions, online experiments and extension activities.

LGfL has added a brief and straightforward guide to support staff INSET and a link to the BBC’s Science Clips website which offers a complementary list of individual activities - although these are less structured and interactive.

www.ve12.lgfl.net

Virtual Experiments for KS2 (USO)
Collins’ Virtual Experiments for junior years is also available on LGfL. You can find it in the KS2 Science menus.

It covers all the units of QCA Primary Science with structured introductions, online experiments and extension activities.

Again LGfL has added a brief and straightforward guide to support staff INSET and a link to the BBC’s Science Clips website which offers a complementary list of individual activities - although these are less structured and interactive.

www.ve34.lgfl.net
History

● Holnet – History of London (O)

The Second World War
Using exclusive resources on London and its people from the Imperial War Museum, this resource covers Evacuation, the Blitz, Shelters and Daily Life.

The downloadable teaching resources include a Y6 activity on producing a 1940s class newspaper, a postcard writing activity where pupils assume the role of a recently-billeted evacuee and a complete work booklet for pupils covering the topic in Years 3 and 4.

Victorian Schools
Using records from the London Metropolitan Archive – the official archive of the London School Board which ran schools in London from 1870 to 1905 – this section has a wealth of both visual and text resources on Schools, Pupils, Subjects and Teachers.

The latter section includes a timeline of the life of a Victorian teacher, Mr Arthur Seer.

www.holnet.lgfl.net

● HeLP – a Victorian Child (USO)

The History eLearning Project follows the life of an individual child to explore nineteenth and early twentieth century life. With added contextual material, pupils are able to study the Victorians and compare how they lived then with how we live now.

The History eLearning Project (HeLP) is a History online learning resource developed specifically for primary schools (Key Stage 2). It has been created by Kingston University’s Centre for Local History Studies and the School of Education, in partnership with The London Grid for Learning and in consultation with Great Ormond Street Hospital for Children.

www.healthhistory.lgfl.net
Modern Foreign Languages (French and Spanish)

- **Rigolo 1 and 2 for Primary French (USO)**

This resource is available online at www.rigolo.lgfl.net

Rigolo is planned carefully so that both non-specialist and specialist language teachers can easily follow a structured progression.

It is a teacher-led resource that combines engaging characters, animated stories and activities which help children to move into Speaking and Listening too. Classroom teachers will find that the activities reflect their experiences with the National Literacy Strategy.

Rigolo 1 includes several teaching and planning tools for the classroom:

- Scheme of work and mapping grids: a full medium term planning scheme for Rigolo 1, plus correlation documents showing how Rigolo 1 meets the KS2 Framework for Modern Languages and covers the language from the QCA scheme of work units and 5-14 guidelines requirements.
- Flashcards – approximately 130 colour flashcard images with matching text captions to use either electronically or printed out for classroom use.
- Worksheets – eight differentiated worksheets for each unit, providing further classroom practice in reading, writing and speaking skills.
- Teacher’s notes – these are quick reference notes that are stored electronically.
- Certificates and portfolios – certificates for pupils and teachers to track their progress through Rigolo 1.

- **Vamos 1 & 2 from Espresso (USO)**

Through the KS2 MFL menu can be found Modules 1 and 2 of Espresso’s resource for KS2 Spanish, covering Greetings, In School, the Alphabet, Numbers, Days of the Week, Festivals and the Weather.

This resource includes lots of video of native speakers, support activities and is up to Espresso’s usual high standards in its use of multimedia.

Access via the KS2 MFL menu and at www.vamos.lgfl.net

- **RM Sonica Spanish (USO)**

Sonica Spanish is an innovative software product commissioned by the DfE. Sonica Spanish is designed to help teachers, including modern foreign language specialists, bring Spanish language teaching into their classrooms.

Under a unique agreement, LGfL is hosting 24 of its 240 activities as an online resource, for home and school use.

www.sonica.lgfl.net
● Camden Languages (O)
Camden LA has worked with a number of non-specialist primary teachers to develop this Scheme of Work for primary schools and has turned it into an online resource to support KS2 French and Spanish.

The lesson plans, flashcards and resources have been used successfully in Camden schools for several years and they now have video content featuring audio support for the non-specialist teacher as well as mimes to facilitate teaching and learning.

www.camdenlanguages.lgfl.net

RE, Citizenship and e-Safety

● Celebrating Us, Us Online and Who We Are (USO)
LGfL’s co-production with ROAR for KS2 and 3 is proving tremendously popular, both as a Citizenship and as a cross-curricular resource.

There are now three units for KS3:

- **What We Do** which focuses on the rights, roles and responsibilities we all have as citizens irrespective of our age
- **Who We Are** (KS1+KS2) which looks at the issues of diversity focussing on identity, stereotyping, discrimination and migration

Find all at www.roar.lgfl.net

● Our Online World and Me Online (USO)
Us Online 2 extends the acclaimed Roar Educate e-safety product with specific content created for the Primary school audience. E.g. Our Online World for KS2-3 and Me Online for KS1.

The resources address digital and web literacy, with all new activities about making and posting content, cyber-bullying, copyright, networking and gaming, privacy and identity fraud, security and passwords, viruses and using the web for research. Modules include user e-safety surveys for each key stage, plus a fully resourced Teacher Centre, with video demos and lesson plans for every activity.

It reproduces age appropriate elements of the online world, giving children and young people an authentic experience of situations online. Activities exploit a range of online techniques – animation, audio, video, gaming and high levels of interactivity – and the media rich product immerses children in the culture of their online world.

www.usonline2.lgfl.net
Espresso's highly visual and engaging resources have won both awards and acclaim.

Commissioned by LGfL, Espresso Faiths looks at the six major world faiths as we would find them in London communities, with London children explaining their faith community to other London children.

Find this in the KS2 RE menu or at www.faiths.lgfl.net

Music

MusicTrax for KS1 (USO)

This unique resource for KS1 Music comes from collaboration between Lambeth Music Services and Charanga.

It supports both the singing and playing aspects of KS1 Music. The instruments supported are recorder, glockenspiel and djembe.

www.musictrax.lgfl.net

Gigajam Junior Interactive Drum School (USO)

Find this at www.gigafun.lgfl.net

Gigabot takes you through lessons, video clips, and a Gigapedia glossary section, to give you all you need to introduce the young learner to the world of drumming.

Start by going to the Exploring the Drums section to discover what each part of a kit is called, what it does, and to build your own drum-kit.
● Music and Fireworks from The Big Bus (USO)

A ‘drag and drop’ Music and ICT activity from The Big Bus, another LGfL software partner.

Build a song and then add fireworks to create your own Son et Lumière.

www.bigbus.lgfl.net

Other products and services

● The LGfL Contemporary Dance project (featuring the Ballet Boyz) (USO)

LGfL has been working with the Ballet Boyz Contemporary Dance Company (Michael Nunn and William Trevitt) to produce online dance resources for all Key Stages. There are three productions with Encore specially designed for KS2.

The finished resources are now available online and include:

- Over 30 Ballet Boyz videos
- More than 20 teacher guidance videos
- 3 pilot school video case studies
- 10 plus performance videos by Ballet Boyz

N.B Some video content is restricted to ‘on grid’ access only.

www.balletboyz.lgfl.net

● Marathonks1 and Marathonks 2 (USO)

LGfL has commissioned a Primary PE unit based on the theme of a collaborative marathon.

There are both KS1 and KS2 versions available.

www.marathonks1.lgfl.net

www.marathonks2.lgfl.net
• Podcast (USO)
Search for, play or create your own podcast with this free-to-use LGfL service. You will need an LGfL USO login to upload this service.

Pupils in Bexley have been creating their own French podcasts and sending them to their link school in Paris!

Find this at www.podcast.lgfl.net

• Video Central Upload Service (USO)

The Video upload service Video Central is an invaluable tool to manage videos within an online environment.

A wide variety of audio and video files can be uploaded and then viewed either by URL hyperlink or via an embed code – allowing videos to be placed within web pages and the London MLE.

Teachers can upload up to 1 Gb files – which can be set for ‘public access’ and therefore can be searchable creating LGfL’s own ‘You tube’ style video database.

www.videocentral.lgfl.net

• National Weather Stations - Online (O / USO)
LGfL has a higher density and level of detail in the monitoring and recording of weather patterns within the Capital region than the Met office! The data sets provide an excellent resource for numerous learning contexts including mathematical investigations. Access to the recorded data requires an LGfL USO login.

With weather stations across London and the UK, schools can track weather systems across the region as well as contrasting inner and outer city conditions.

Yorkshire and Humberside Grid for Learning has also installed weather stations across its region, and other learning grids are following this example.

www.weather.lgfl.net
- **Espresso ‘At Home’ (USO)**

  The London Grid for Learning and Espresso have agreed and arranged that an LGfL USO login can be used to gain access to the whole of Espresso content, at home, for teachers from schools which subscribe to Espresso and have an LGfL ‘USO’.

  Go to any menu for a KS1 or 2 core subject and select the ‘Espresso at home for teachers’ option. You will be asked to enter your LGfL USO username and password to gain access to the Espresso content.

- **JIT – Online Infant toolkit (USO)**

  The online infant toolkit allows the following features - all linked via the LGfL USO log in:

  - Word processing
  - Animation
  - Graphing
  - Painting
  - Pictogram
  - Turtle control
  - Mix of all the above into an online document

  [www.jit.lgfl.net](http://www.jit.lgfl.net)

- **Busy Things (USO)**

  LGfL's most popular premium content offers over 100 activities for early years children to explore on their own or within a group / whole class context.

  All the activities in Busy Things link to the Early Learning Goals and other Development Matters objectives within the Communication Language and Literacy, Problem Solving, Reasoning and Numeracy, Knowledge and Understanding of the World and Creative Development areas of learning and development.

  The literacy activities also link to phases one, two and three of Letters and Sounds: Principles and Practice of High Quality Phonics and the Jolly Phonics scheme of work.

  [www.busythings.lgfl.net](http://www.busythings.lgfl.net)
Race to Learn (USO)

Race to Learn is an exciting cross-curricular teaching resource that promotes group learning. The children make their own racing teams of 4 or 5, establish a team identity, and undertake educational activities that resemble functions of a real Formula One™ racing team.

These rewarding educational activities are cross-curricular and linked to the relevant National Curriculum/Framework objectives.

What makes this teaching resource different is the real-life context for learning. While learning about key curriculum topics, pupils will be engaged and excited by the real-life context of Formula One racing.

www.race2learn.lgfl.net

Harrow – Visual Literacy (O)

This excellent project highlights the work of a group of Advanced Skills Teachers, using TAG’s Digital Blue, a low cost, robust digital camera.

Working with a range of classes from schools at both KS1 and 2, Harrow has produced some excellent examples of how to use basic video cameras to engage young pupils in producing innovative work.

www.harrowvl.lgfl.net

Film Street (Available Summer 2011) (USO)

This part-LGfL-funded resource is designed to deliver inspirational video and interactive content on the theme of filmmaking and animation.

Film Street will be a rich and varied resource to support teachers in their use of visual literacy and will motivate young people to extend their learning.

It will have online workshop activities such as an online ‘stop frame animator’ and also practical offline activities for teachers to undertake with existing equipment in school.

The new site will demystify the artistic process and build understanding of film and filmmaking and the role of film and video in the media.

www.filmstreet.lgfl.net
Making the News 2 is a website designed to introduce students to the world of online media publishing and broadcasting for the 21st century.

Teachers can create a homepage on MTN for their school. Students can then login and create articles and programmes which will be submitted to the teacher and if approved, published on the school homepage. Well rated articles will be added to the National MTN2 site.

Articles may be text and images or they may be video, audio or a sequence of images. MTN2 has an online video editor feature built into the website.

The Media Editor allows you to sequence video, audio, images and text to create an article. The programme editor allows you to create a news programme including:

- opening titles
- avatar anchors that speak your audio
- video embedded in scenes
- fullscreen video
- credits

‘LGfL – School Closure Curriculum’ (O)

There are a number of reasons why there could be widespread school closures in London such as including severe weather conditions or a flu pandemic.

Should such a situation arise, LGfL has a wealth of online content to support a school closure curriculum for teachers, children, parents and carers.

LGfL has made ready a one week programme of learning activities to help parents and carers provide children with a means to sustain their education from home.

www.closure.lgfl.net

LGfL Digital Collections

**British Pathe (S)**

British Pathe provided a weekly newsreel which appeared in almost every cinema from 1896 to 1976. They have digitised these news stories to provide a unique online resource covering all manner of topics from sport to fashion, politics to war.

The site has over 3,500 digitised video clips and nearly 12 million stills, all downloadable at no cost - if your school is connected to LGfL.

www.pathe.lgfl.net
● Audio Network (S)

When it comes to using recorded music in presentations or plays, schools have a problem – infringement of copyright and potential legal action.

The Audio Networks collection of 18,000 tracks of original music, sorted by style and genre, provides both a solution to the problem of copyright and a rich, high quality resource widely used within the media industry.

Search for something ‘peaceful’ to set the tone as children enter the room or perhaps ‘spooky’ to open your Halloween production. An extremely expensive resource made free to use for LGfL connected schools.

www.audio.lgfl.net

● Using Audio Network in the Primary Classroom (O)

Audio Network is a fabulous resource. But how would you use it in the classroom to support key areas of the curriculum?

Alexandra Junior and Heston Infants schools in Hounslow have tried and tested a number of different ways in which the music files can be used to support Literacy, ICT and Personal, Social and Emotional Development, as well as fun ways of using the music files to help with classroom and behaviour management.

This project comes with full lesson plans, downloadable classroom resources and videos of teachers explaining how they used this resource.

● LGfL Gallery (O)

There is no such thing as ‘copyright free’ resources - so LGfL has sought to provide digital resources that can be used in an educational context without breaking the law.

For example, the LGfL gallery offers high quality, high resolution digital photographs for staff and students to incorporate into their everyday learning activities.

www.gallery.lgfl.net
Your school's connection to the London Grid, or possession of an LGfL ‘USO’ username and password, gives you access to the open content of the other twelve Learning Grids across the UK.

- **Shared content on the National Education Network**

  Find this from the NEN tab on LGfL’s content grid or directly at [www.nen.gov.uk/tandl](http://www.nen.gov.uk/tandl)

  Use the NEN content table to search for free content.

The London Grid for Learning is a founder member of the National Education Network, the UK collaborative network for education, providing schools with a safe, secure and reliable learning environment and direct access to a growing range of online services and content.
So much to see – so little time

You may by now be thinking ‘there is so much material provided with LGfL for the teachers in my school to use, but so little time to tell them about it!)

A good way to raise awareness, which can be very effective, even if you only have a few minutes available in a staff meeting, is to show one of the ‘What on LGfL?’ videos which you can use from www.videos.lgfl.net

If you have a little more time available, for example for a twilight Inset meeting, it may be possible for you to arrange a presentation by a member of the LGfL Curriculum Consultant Team. These are fully qualified, experienced and successful teachers who have an established track record of enhancing learning and attainment through the effective use of ICT and in leading others to do the same.

Find out more about LGfL Curriculum Consultants at www.consultants.lgfl.net

To make the best use of LGfL resources and services, both within and outside of school, it is essential for each user to have their own LGfL login credentials, their ‘USO’, or Unified Sign On. This is one username and password for each teacher, and for each pupil, which gives access to all LGfL resources, even when outside of school (except one or two which are marked (S)).

USO is also the key to many other LGfL services such as a brilliant email service, masses of online storage ‘in the cloud’, and even free Microsoft ‘Office’ applications, for use on line. Teachers need their USO to upload videos to ‘Video Central’ and Podcasts. If your school is one of the many which uses the LGfL ‘London MLE’, then your USO can be the key to that as well.

To learn more about LGfL’s unique USO system please visit www.uso.lgfl.net – it will not cost you a penny extra, it is all included with the LGfL broadband connection.

We hope you and your pupils enjoy using all that is provided for you on LGfL. Please ensure your school is deriving the maximum benefit from the resources that come with your London Grid for Learning education broadband connection.
